November 2009

INTRODUCTION FINANCIAL SHARED SERVICE CENTER

As per 28 October the Dutch accounting departments of Driessen Galley Equipment (DEN), Cargo (DCN) and the Holding moved to one location in Wieringerwerf. This step is the start of the next phase towards a Financial Shared Service Center (FSSC), a professional service department for standardized accounting processes. The FSSC will service the controllers with financial output.

With the help of interim project leader Henny Gruis, the department will be levelled to a service unit, with high quality and total process control. All accounting processes will be analyzed, described and standardized. Together with the controllers this will end up into a Service Level Agreement. The advantage for Driessen worldwide is a small but efficient service oriented organization, ready for the future.
